Projects

Grub Delivery	07/2024 - Present
<i>Description:</i> Grub Delivery is a frontend-focused food delivery platform that helps users explore restaurants, view menus, and check prices with seamless UX. Built with MERN stack, this 1st-semester project was led by me, emphasizing intuitive UI/UX design while coordinating backend integration with teammates. The project showcases my skills in creating responsive interfaces and enhancing user experience through clean design and efficient functionality.	
Expense Tracker	04/2023 - 06/2024
<i>Description:</i> Expense Tracker is a smart web app to help users manage daily expenses with ease and clarity. Track income, categorize spending, and view insightful charts for better financial decisions. Responsive design ensures smooth usage across mobile and desktop devices. Powered by the MERN stack, it offers real-time updates, secure login, and personalized dashboards.	
Personal Portfolio	05/2022 - 01/2022
<i>Description:</i> My Portfolio Website showcases my journey as a Full-Stack Web Developer. Explore my projects, skills, resume, and design work all in one interactive space. Built with a clean, responsive layout to provide a smooth experience on any device. Developed using the HTML, CSS and JavaScript blending performance with modern aesthetics.
